What is the most
well-known in the
world?

And the best-selling toy?

And the most easily
recognisable?

Source: ruwix.com

- 
- The Magic Cube was invented in 1974, as a teaching tool to help his students understand 3D objects - architects
 - There are more, than 400 million pieces sold by now
 - It has won Game/Toy of the Year Awards in Germany, UK, France and US as well.
 - The beauty of the Rubik's Cube: the simplicity of its rules and the difficulty of the challenge
 - Can be solved by knowing as much as 7 algorithms
